SKILLS

- **Languages:** Python, Ruby, Go, JavaScript, C++, Java, Shell Scripting, SQL.
- **Tools:** TensorFlow, Scikit-Learn, Keras, Docker, Numpy, Pandas, GraphLab, AWS, Jupyter, Spark, Hadoop, MongoDB, Postgres, Redis, Unix.
- **Modeling:** Deep Neural Networks, Hyper Parameter Tuning, SVMs, Structuring ML projects, Decision Trees, Clustering and Retrieval, Boosting.

PROJECTS

- **Kalman Filter** - https://github.com/moisesvw/extended_kalman_filter2D March 2018
 - Tracked and estimated velocity and position of a moving bicycle base on RADAR and LiDAR sensors.
 - Developed an Extended Kalman Filter with C++ to fuse sensors to produce estimation and tracking.
 - Kept the root mean square error under expected values
- **Cervical Cancer Screening** - <https://github.com/moisesvw/mlnd-cervix-screening> September 2017
 - Developed a Cervix type classifier given an image in a Kaggle competition.
 - Used TensorFlow, Scikit-Learn, and Pandas to build a pipeline to train a Convolutional Neural Network
 - Positioned in the Top 30% of the kaggle competition.
- **Traffic Sign Classifier** - <https://github.com/moisesvw/Traffic-Sign-Recognition> March 2017
 - Built a classifier that correctly classifies 43 German Traffic Signs with 96% accuracy in the test set
 - Develop a pipeline to build a Convolutional Network base on LeNet-5 with TensorFlow and Python.

EXPERIENCE

- **Twilio** - *Senior Software Engineer* Bogotá, Colombia | November 2015 - December 2017
 - Programmed and maintained software that support more than 6M of users on Account Security Team.
 - Built and Designed secure API in collaboration with technical leads and architects.
 - Monitored services in on-call duties.
- **Upwork** - *Freelance Software Engineer* Remote, San Francisco, CA | February 2014 - November 2015
 - Delivered 16 software projects, keeping average review rate in 4.9/5.0
 - Addressed customer requirements and maintained effective communications.
 - Built entire website portal for Indie Games in 1 week.
- **Humantelligence** - *Software Engineer* Remote, Miami, FL | March 2014 - March 2015
 - Engineered continuous delivery and continuous integration process for Culture Analytics Platform.
 - Developed a robust base test suite for unit and integrations tests with more than 800 covered cases.
 - Built pipeline process of data generation in background.
- **Stack Builders** - *Ruby Developer* Remote, New York, NY | March 2012 - February 2014
 - Worked in an international and cohesive development Team on 3 world-class projects.
 - Built backend and frontend software for online banking and payments platform.
 - Developed pieces of software for real estate CMS system.

EDUCATION

- **Udacity** - *Self-Driving Car Engineer* Current - Term 2/3
- **Deeplearning.ai on Coursera** - *Deep Learning Specialization* February 2018
- **Udacity** - *Machine Learning Engineer* November 2017
- **University of Washington on Coursera** - *Machine Learning Specialization* February 2017
- **Institución Universitaria UNIAJC** - *Bachelor of Engineering in Computer Science* October 2014
- **Universidad del Valle** - *Bachelor of Technology in Computer Science and Engineering* October 2010
